GEN2 VST

The vertical configuration of the GEN2 VST® TITO printer is compact and is specifically designed for space-saving slim-top gaming machines. Like the GEN2™ printer, the GEN2 VST printer offers improvements such as ITH™ (Intelligent Ticket Handling), IntelligentBezel™ system, ProColor™ printing, and more.

The ITH technology sets the printer apart from competing TITO printers by making the “cashout ticket” available ONLY after the ticket is fully printed internally and automatically burst. To improve the printer’s reliability further, the IntelligentBezel feature detects for obstruction near the bezel and reduces paper jams, by waiting for a clear path before a ticket is ejected.

In addition to the game port (RS232 or NetPlex), a separate port is provided for convenient firmware upgrades without the need to remove the printer from the slot machine.
